## **IMMEDIATE PRESS RELEASE:**

San Antonio, Texas, August 10, 2020

**Today My EV Charger Company Headquarters in San Antonio Texas announces the availability of \$10.4 million in grant funding for reimbursement of up to \$2,500 for the purchase and installation of Level 2 charging equipment for light-duty zero emission vehicles in the State of Texas.**

The Texas Volkswagen Environmental Mitigation program (TxVEMP) is preparing to make grants available in The State of Texas. Grants will be awarded on a first-come first served basis. Funding is available statewide for equipment installed.

Plus a Federal Tax Credit of 30% will apply for equipment and installation which expires 12-31-20.

**Richard Osuch, President of My EV Charger Company, shares his thoughts on the new incentives:**

“The Electric Revolution is here! Tesla is currently building the world’s largest automobile manufacturing plant in Austin, Texas. Automotive manufactures are coming out with 19 new EV brands and models in 2021 with more to follow in E-Mobility. Smart EV charging platforms streamline the charging experience for drivers while optimizing usage and revenue for businesses and building owners. Importantly, all our technology standards ensure secure future-proof solutions.”

***-Richard Osuch, President and Founder of My EV Charger Company***

Additionally, during the Covid-19 pandemic, My EV Charger consultants will provide a complementary evaluation on how to seize the emerging opportunity to develop a broader movement in the electric vehicle sector and electric infrastructures. Let's help the United States reduce LDV emissions and move the country closer to its climate goals.
